Mr. Ed Longo
Executive Director of Sales
Sun Coast Chemicals of Daytona, Inc.
77 Hargrove Grade
Palm Coast, FL 32137

Dear Mr. Longo:

As you are aware, we have been using X-1R in our fleet of Semi Tractors, and Dump Trucks with the majority being Mack, DM - and-R models. Our fleet of trucks and road paving equipment presently exceeds over 475 units.

We have incorporated X-1R into our every day on going maintenance program and are extremely happy with our results. As you know our Florida weather conditions play navoc on our equipment (between the extreme heat, rain, and dust). We are seeing a considerable reduction in wear on our equipment.

I think one of the biggest factors of concern for us is contamination. We are required with our intense maintenance program to pull oil samples on all of our engines, transmissions, differentials, and gear boxes, every 7,500 miles or 250 hours.

We have tried other products, and before using X-1R (Mobil Oil testing labs in Georgia who does our oil samples) were sending the oil results back (bad and contaminated) between 25,000 and 30,000 miles average.

Since using X-1R we are seeing an amazing difference. I am sending oil samples out with 50,000 and 60,000 miles on them and they still come back with good reports. This has really caught everyone's attention involved in our program. The savings alone in this area has kept X-1R a major part of our maintenance program.

Thanks again, and keep up the good work.

Sincerely,

Matt Masters
